OHIO FARM INCOME

This is the fourth year the format was revised to exclude county extension districts. Instead, counties are listed in alphabetical order. Cash receipts during 2007, from Ohio's livestock, livestock products, and crops totaled \$6.90 billion, 22.9 percent above last year's \$5.61 billion. Cash receipts from all crops in 2007 were up 20.4 percent from 2006, and cash receipts from livestock were up 27.3 percent.

The 2007 value of cash receipts for crops was \$4.37 billion. Based on the preliminary estimates hereof this breaks the record of \$3.63 billion set in 2006 by a margin of 20.4 percent. The percentage of total farm marketings attributable to crops in 2007 was 63.4 percent, 1.3 percentage points below the corresponding figure from the revised 2006 data.

The 2007 cash receipts for livestock and livestock products totaled \$2.53 billion. This was the highest total of all time, and was 27.3 percent higher than last year (2006). The percentage of total farm marketings earned by livestock and livestock products was 36.6 percent, 1.3 percentage points above the corresponding figure from the revised 2006 data.

Government payments totaled \$268.67 million, 38.5 percent below last year's \$436.68 million. This represents 3.7 percent of total cash receipts including government payments.

Ohio agriculture contributed a net value added of \$3.27 billion to the National economy in 2007, up from \$2.60 in 2006. The final agricultural sector output, at \$8.44 billion, was up 24.5 percent from 2006. Purchased inputs totaled \$4.12 billion, up 24.1 percent from last year. Capital consumption was at \$1.02 billion up 3.2 percent from 2006, while payments to stakeholders at \$1.32 billion were up 9.4 percent.

The top five commodities in terms of cash receipts earned were **soybeans** with \$1.532 billion and 22.2 percent of total receipts; **corn** with \$1.502 billion and 21.8 percent of total receipts; **wholesale milk** with \$985.050 million and 14.3 percent of total receipts; **poultry and eggs** with \$695.791 million and 10.1 percent of total receipts; and **greenhouse and nursery** with \$647.4 million and 9.4 percent of total cash receipts. The commodities ranked sixth through tenth were hogs, cattle and calves, wheat, vegetables, and hay, respectively. The top ten commodities accounted for 97.2 percent of all Ohio cash receipts.

The following ten counties ranked first through tenth, respectively, based on total cash receipts: Mercer, Darke, Wayne, Licking, Hardin, Wood, Putnam, Holmes, Madison, and Fulton. Wayne county ranked first in milk, cattle and calves, and oats & hay. Mercer county ranked first in cash receipts for hogs, poultry and other livestock. Darke county was in first place for corn and soybeans. Wood county was first for wheat, and Lorain county ranked number one for other crops.

This year's report includes publication of revised data by county for 2006 in addition to the 2007 preliminary data. The publication of the revised 2006 data by county permits a better comparison of the two years after the revisions have been made to reflect more complete data.

The publication is available online at <http://www.nass.usda.gov/oh/>.

Net farm income	1,484,361	1,388,132	1,949,739	57,598,067	86,035,331

1/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 2/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

2/ Includes rye, barley, tobacco, oil crops, potatoes, fresh market, processing and greenhouse vegetables, fruits, nuts, and all other crops.

PROCEDURE

Estimates of cash receipts from Ohio farm marketings were published initially in 1927 and annually since 1929. These county estimates of cash receipts for 2007 are published by the Department of Agricultural, Environmental and Development Economics of the Ohio State University's College of Food, Agricultural, and Environmental Sciences and the Ohio Agricultural Research and Development Center in cooperation with the National Agricultural Statistics Service of the United States Department of Agriculture. This bulletin contains preliminary 2007 Ohio county and state cash receipts estimates, and revised 2000-2006 state estimates. Also included are revised 2006 county and state cash receipts estimates to reflect the changes in county data from the preliminary estimates published in 2006. County production and inventory estimates of various commodities are published annually in the Ohio Agricultural Statistics bulletin..

Current cash receipts from farm marketings of farm products represent calendar year gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by CCC and purchases under price support programs. The value of home consumption and production expenses is excluded. County estimates of cash receipts from farm marketings are derived by allocating state estimates to counties on the basis of crop and livestock production and Census marketings. Check data such as county dairy production from the milk market administrators are also used.

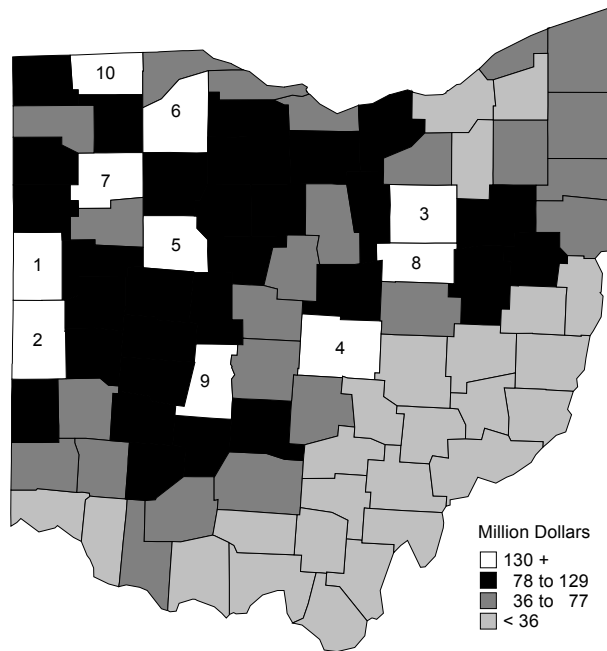

The definition of a farm includes a place which has annual sales of agricultural products of \$1,000 or more. This definition has been used since the 1974 Census of Agriculture. The average cash receipts per farm will aid in the comparison of counties with similar farm practices better than a comparison of total cash receipts.

This bulletin has been prepared through the efforts of many people, including personnel of agricultural agencies throughout Ohio. The greatest recognition is due to the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling this information.
