## OHIO FARM INCOME

Cash receipts during 2008, from Ohio's livestock, livestock products, and crops totaled \$7.98 billion, 19.2 percent above last year's \$6.69 billion. Cash receipts from all crops in 2008 were up 26.0 percent from 2007, and cash receipts from livestock were up 8.3 percent.

The 2008 value of cash receipts for crops was \$5.24 billion. Based on the preliminary estimates, this breaks the record of \$4.16 billion set in 2007 by a margin of 26.0 percent. The percentage of total farm marketing's attributable to crops in 2008 was 65.6 percent, 3.5 percentage points above the corresponding figure from the revised 2007 data.

The 2008 cash receipts for livestock and livestock products totaled \$2.74 billion. This was the highest total of all time, and was 8.2 percent higher than last year (2007). The percentage of total farm marketing's earned by livestock and livestock products was 34.4 percent, 3.5 percentage points below the corresponding figure from the revised 2007 data.

Government payments totaled \$275.24 million, 2.4 percent above last year's \$268.67 million. This represents 3.3 percent of total cash receipts including government payments.

Ohio agriculture contributed a net value added of \$2.95 billion to the National economy in 2008, up from \$2.55 billion in 2007. The final agricultural sector output, at \$8.75 billion, was up 11.8 percent from 2007. Purchased inputs totaled \$4.71 billion, up 11.0 percent from last year. Capital consumption was \$1.09 billion, up 6.3 percent from 2007, while payments to stakeholders, at \$1.00 billion, were down 2.7 percent.

The top five commodities in terms of cash receipts earned were **corn** with \$2.071 billion and 26.0 percent of total receipts; **soybeans** with \$1.874 billion and 23.5 percent of total receipts; **wholesale milk** with \$1.005 billion and 12.6 percent of total receipts; **poultry and eggs** with \$866.8 million and 10.9 percent of total receipts; and **hogs** with \$434.7 million and 5.4 percent of total cash receipts. The commodities ranked sixth through tenth were wheat, cattle and calves, greenhouse/nursery, vegetables, and hay, respectively. The top ten commodities accounted for 96.6 percent of all Ohio cash receipts.

The following ten counties ranked first through tenth, respectively, based on total cash receipts: Mercer, Darke, Wayne, Putnam, Hardin, Licking, Wood, Wyandot, Stark, and Madison. Wayne County ranked first in milk, cattle and calves, and oats & hay. Mercer County ranked first in cash receipts for hogs and poultry and other livestock. Darke County was in first place for corn and soybeans. Wood County was first for wheat, and Lake County ranked number one for other crops.

This year's report includes publication of revised data by county for 2007 in addition to the 2008 preliminary data. The publication of the revised 2007 data by county permits a better comparison of the two years after the revisions have been made to reflect more complete data.

This publication is available online at <http://www.nass.usda.gov/oh/>. After you get to our home page, click on **Ohio Publications**, and then click on the **Farm Income** icon.

1/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 2/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

87	Lake	Noble	Lake	Lucas	Fayette
88	Cuyahoga	Belmont	Cuyahoga	Cuyahoga	Noble

<sup>2/</sup> Includes rye, barley, tobacco, oil crops, potatoes, fresh market, processing and greenhouse vegetables, fruits, nuts, and all other crops.

## PROCEDURE

Estimates of cash receipts from Ohio farm marketings were published initially in 1927 and annually since 1929. These county estimates of cash receipts for 2008 are published by the National Agricultural Statistics Service, Ohio Field Office, of the United States Department of Agriculture. This bulletin contains preliminary 2008 Ohio county and state cash receipts estimates, and revised 2000-2007 state estimates. Also included are revised 2007 county and state cash receipts estimates to reflect the changes in county data from the preliminary estimates published in 2007. County production and inventory estimates of various commodities are published annually in the Ohio Agricultural Statistics Annual Report.

Current cash receipts from farm marketings of farm products represent calendar year gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by CCC and purchases under price support programs. The value of home consumption and production expenses is excluded. County estimates of cash receipts from farm marketings are derived by allocating state estimates to counties on the basis of crop and livestock production and Census marketings. Check data such as county dairy production from the milk market administrators are also used.

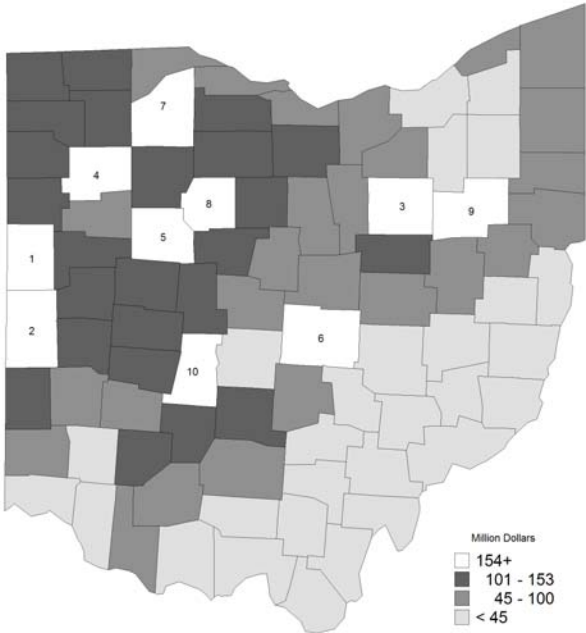

The definition of a farm includes a place which has annual sales of agricultural products of \$1,000 or more. This definition has been used since the 1974 Census of Agriculture. The average cash receipts per farm will aid in the comparison of counties with similar farm practices better than a comparison of total cash receipts.

This bulletin has been prepared through the efforts of many people, including personnel of agricultural agencies throughout Ohio. The greatest recognition is due to the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling this information.
