

Environmental Policy Initiative Seminar

“Statistical vs. Identified Lives in
Benefit-Cost Analysis”

Speaker:

James K. Hammitt
Center for Risk Analysis
Harvard University

Monday, May 15th, 2006

1:30 - 3:00 p.m.

Room 105

Agricultural Administration Building

2120 Fyffe Road

Revealing information concerning heterogeneity of both risk (source of pollution) and susceptibility (age, sex, current health, etc) has been found to affect both willingness to pay and willingness to accept measures used in benefit-cost analysis.
