

NEW SPRING CLASS: **SUSTAINABLE ENERGY**

AEDE 4321 – 0010

The Department of Agricultural, Environmental, and Development Economics is excited to offer a new course on Sustainable Energy.

Students will learn about:

- A broad array of energy sources and technologies including natural gas, nuclear, wind, solar, geothermal, hydro, biofuels, hydrogen, electric vehicles, batteries and storage.
- Economic and market forces that shape future trends.
- Energy efficiency and demand-side management.
- How electrification will drive the energy transition and affect sustainability.
- Impacts of various policies, subsidies and regulations.
- How to evaluate the underlying economic and policy implications of sustainable energy projects.

Lectures: Tuesday/Thursday, 12:45 – 2:05 p.m.

Location: University Hall 028

Credits: 3 hours

It will also count toward a new Undergrad Certificate that will be announced soon.
