This is one of the most popular YouTube channels on Econometrics with over 6 million views, and over 50,000 subscribers since its inception in 2013. A Ph.D. and a Master's level courses in Econometrics with Stata and R are posted on the Econometrics Academy website and YouTube channel.

University Teaching – Current Courses Taught

AEDECON 3103 Principles of Agribusiness Finance, The Ohio State University, 2016-present.

Undergraduate level course in agricultural finance, 3 credit hours. Enrollment of 50-90 students annually. The course includes financial statements and ratio analysis, capital budgeting, time value of money, and credit evaluation. Educational tools include Excel examples, case studies, and team projects.

AEDECON 6110 Applied Quantitative Methods I, The Ohio State University, 2016-present.

Master's level course in applied econometrics, 4 credit hours. Enrollment of 20 students annually. The course includes lectures on different econometric models, followed by model estimations using Stata and R. Topics include multiple regression model, regression inference, heteroscedasticity, panel data models, instrumental variables, probit and logit models, and other topics.

AEDECON 8202 Agricultural Finance, The Ohio State University, 2022.

PhD's level course in agricultural finance, 2 credit hours. Enrollment of 7 students. The course includes lectures on agricultural financials models and theory, followed by reading journal articles on these topics.

University Teaching - Past Courses Taught

AEDECON 7140 Applied Econometrics II, The Ohio State University, 2015.

Ph.D. level course in applied econometrics, 3 credit hours. Enrollment of 10 students. The course includes an overview of different econometric models and model estimations using Stata and R. Topics include discrete and limited dependent variable models, panel data models, time-series models, instrumental variables, survival analysis, spatial econometrics and other special topics.

AEC 441G Agricultural Financial Management, University of Kentucky, Spring semesters, 2009-2014.

Undergraduate level course in agricultural finance, 3 credit hours. Enrollment of 25 students annually. The course includes financial statements and ratio analysis, capital budgeting, time value of money, and credit evaluation. Educational tools include Excel examples, case studies, and team projects. AEC 724 Applied Econometrics, University of Kentucky, Spring semesters, 2009-2014.

Graduate level course in applied econometrics, 3 credit hours. Enrollment of 10 students annually. This course introduces students to the econometric models, estimation procedures, and model applications in the literature. The course includes an overview of different econometric models, model estimations using Stata, R, and SAS, discussion of agricultural and applied economics papers applying these models, and writing mini projects and a term paper with econometric applications. Topics include discrete and limited dependent variable models, panel data models, time-series models, instrumental variables, survival analysis, spatial econometrics and other special topics.

731013 Applied Econometrics, BOKU (University of Natural and Life Sciences), Vienna Austria, 2012. Graduate course supported by Fulbright Specialist Program Grant.

AEC 780 Research Methods, University of Kentucky, 2010.

Graduate level course in research methods, 3 credit hours. Enrollment of 5 students. This course is intended to help students develop a more comprehensive understanding of the research process, with specific reading and writing assignments focusing on the development of research topics, papers, and presentations.

ACE 261 Applied Statistical Methods, University of Illinois, 2002-2007.

Undergraduate level course in statistics, required course, 4 credit hours. Enrollment of 90 students annually. Course includes lectures and computer labs. Instruction

emphasizes fundamental statistical concepts, real world examples, and Excel data analysis. Course development and innovations were supported by five teaching enhancement grants from the college and department.

ACE 542 Advanced Agricultural Finance, University of Illinois, 2002-2005.

Graduate level course in agricultural finance, elective course, 3 credit hours.

Enrollment of 5 students annually. Course includes lectures on financial theory, reading agricultural finance papers, and writing a term paper.

Workshops Taught

Introduction to R, Introduction to Stata, and Introduction to R, The Ohio State University 2015.

Graduate level two-hour workshops. These are short courses intended for students with limited or no previous use of R, Stata, or SAS. Enrollment of approximately 15 students per workshop.

Introduction to SAS and Introduction to Stata, University of Kentucky, 2009-2011.

Graduate level two-hour workshops. These are short courses intended for students with limited or no previous use of SAS or Stata. After taking the courses, students will be able to do basic data analysis using SAS and Stata for their research projects. Total enrollment of 100 students from 20 different departments.

Introduction to SAS and Intermediate SAS, University of Illinois, 2003-2005.

Graduate level half-day workshops on SAS, part of the Annual Software Festival on major statistical packages used for research in applied economics.
