

PURPOSE: Students will understand the application of economic principles to contemporary natural resource and environmental processes, problems, and policies. Relevant complementary principles in ecology, hydrology and thermodynamics are also emphasized. Students acquire a solid foundation in the theories and methods of natural resource economics and benefit-cost analysis for addressing issues such as soil and water conservation, pollution control policy, land use, environmental benefit estimation, and management of natural systems.

REQUIREMENTS AND RESPONSIBILITIES: Students are responsible for planning their minor program to achieve **12 hours**. AEDECON or ECON 2001 is a prerequisite. At least six (6) credits must be at the 3000 level or above.
