

Master of Applied Economics (MAE)

The MAE is a **two-semester professional program** giving graduates skills in the practical application of economic theory and advanced quantitative methods, to find solutions for an array of societal challenges in a variety of fields. With strong foundations in economic theory and cutting-edge empirical techniques, graduates are positioned for professional careers in business, banking and finance, consulting, government agencies, international agencies, research institutions and non-governmental organizations. The program is jointly offered by the *Department of Economics* and the *Department of Agricultural, Environmental, and Development Economics*, allowing students to leverage the expertise of world-class faculty in both theoretical and applied economics.
